

TX - PORTABLE Pallet Strapper

INCLUDED FEATURES

Powered
Bayonet

Manual
Controls

Retractable
Power Cord

Auto
Tension/Weld

APPLICATIONS: Unitize | Secure

The TX® Portable Pallet Strapper is a semi automatic on the go solution with a simplistic manual control panel.

The TX® robust solid steel frame contains our intricate yet ergonomic TX® direct drive 4 in 1 strapping system. This system encompasses highly efficient, non proprietary technology. Every unit is equipped with an electronic, retractable strap bayonet to feed strapping through or under your load without needing to manually feed the strap. This unit eliminates the need for costly battery powered strapping tools and allows operators a more ergonomic way to strap loads.

Our TX® Portable Pallet Strapper semi automatic best suits any stationary or mobile pallet strapping applications that desire superior performance with the lowest cost of ownership on the market.
